

- PE 100 bends formed out of pipe

PE 100 bends formed out of pipe for gas, water and sewage applications

We close a gap

Our subsidiary AGRU-FRANK GmbH produces high quality PE pipe for gas, water and sewage applications. After intensive development, we put into operation an automatic machine for bending pipe (pieces). Bends are manufactured with the latest technology. The automatic production process assures a repeatable and controlled quality.

The result

To keep today's arrangements, we manufacture dimensionally stable bends of high quality PE pipe. Due to the complete in-plant production and our big stock of formed bends we realize very short delivery periods. Thus, a flexible and customer-friendly execution of your order is ensured.

Advantages

- high dimensional flexibility
- approved pipe material for different applications
- with long and plain ends for butt- and double electro fusion welding
- no thermal stress of pipe ends during the production, therefore high dimensional accuracy
- clear marking
- OIT-value > 20 minutes after production
- end caps on both sides
- 3.1 certificate
- FM-approval

Delivery programme

- made of PE 100, black
- OD 90 - 315 mm
- SDR 17 and 11
- bending 11°, 22°, 30°, 45° and 90°
- bend radius 1,5 x d
- other materials, bending and colours on request
