

Project in Russia

Project description

More and more people are looking for fresh and selected food everywhere in the world and therefore also more and more fish farms are designed. One of our customer, Hesy Aquaculture BV, a manufacturer of recirculating aquaculture systems for intensive fish production requires PE pipes in different dimensions in SDR 33 for this application. These pipes are used for inflow, outflow and drainage systems within this plant.

Scope of supply

- 303 m PE 80 pipe OD 500 x 15,3 mm, SDR 33
- 220 m PE 80 pipe OD 400 x 12,3 mm, SDR 33

Services of FRANK

- ✓ Delivery of material

Time frame

A long planning of our customer was done during several months but finally the project was executed in summer/autumn 2007 together with a lot of business trips to Russia.
